Soaping agent
WF-4007N

Chemical Structure

Recombinant of surfactants and polymer macromolecules

Technical Index

Item	Standard
Appearance	Yellow transparent liquid
Solid Content, %	46.0-48.0%
PH Value (1% water solution)	6.0-8.0
Ionic	Anionic/Nonionic

Features and Advantages

1. It has excellent cleaning, dispersion and suspension effects on unbound dyes, alkali agents and electrolytes.
2. It has excellent anti-staining effect on the white surface of fabrics.
3. It has good chelating ability for calcium and magnesium ions, which can effectively prevent calcium spots and soap spots from forming during the washing process with soap.

Application

Soap used for restoring dyes, direct dyes, reactive dyes, and naphthol dyes in printing and dyeing fabrics.

Dip concentration: 1-3g/L
Wash concentration: 2-6g/L
For detailed process, users are advised to make appropriate adjustments based on actual test samples.

Package

120KG Plastic Drum or other packing on request. Sealed and light-proof storage.
